

MapRun

How to find the App

Use Google Play (Android) or the App Store (Apple) and search for “MapRun’ developed by FNE Enterprises. The MapRun icon looks like a green M. Download the App. It is free.

How to use the App

THE APP HOMEPAGE HAS FOUR ITEMS

NAME

Use this menu to provide your details: these will include your surname and first name, gender, email address, year of birth and post code.

SELECT EVENT

From the list of folders choose **MR UK** and then **MR Manchester**. Find and download the event. You can do this anytime before your run. You are allowed a paper map and control descriptions, but how you obtain these will vary by event. Fully charge your phone before your run.

GOTO START

Clicking on this will require you to enter the course PIN. Do NOT do so until you are 30m or so from the Start.

The map and course will appear on the screen. Your elapsed time and remaining time will appear in the top left hand corner. Click on the ‘Start GPS’ button in the top right hand corner and walk towards the Start. Once the App locates you at the Start it will bleep to indicate your race has begun. As you visit each control the App will bleep again and the appropriate control circle will turn from purple to green.

The Finish will not be activated until you visit your first control, but remember to avoid the Finish until you want to actually finish.

Having finished you will be prompted to load your results to the event database. You can also load the details to your Strava account - if you have one.

SHOWRESULTS

Use this to view the details of your run stored on your Smartphone.

How to find all the results for the event

Visit <http://maprunners.weebly.com/results.html> to see the results of the other competitors. There are three views for analysis: firstly the **Leader Board**; secondly **Time Splits** which takes you to SplitsBrowser; and finally **Runners Routes** which is powered by RouteGadget.

Your MapRun event will be a Score event

A Score event is great for route choice. Competitors visit controls in any order they choose in order to score 10 points each. The catch is that there are too many controls to visit in the time allowed and a penalty of 30 points per minute for taking too long. The competitor who scores the most (positive) points wins.

And with MapRun you can always try again.....
